Professional Summary

Software Engineer, Team Lead and AWS Certified Solutions Architect with advanced knowledge of JavaScript and TypeScript. Over 7 years of experience in backend development using Node.js, NestJS, and cloud platforms (AWS, GCP). Proven leadership experience in building and scaling engineering teams, establishing development processes, and delivering production-grade web and server applications from scratch.

Work Experience

Server Team Lead

OwnPlay — Remote
Dec 2022 — Jul 2025

- Led a team of 5 software engineers, establishing processes and workflows from the ground up to streamline productivity and quality.
- Collaborated closely with the product and business teams to design systems, define tasks, and align technical solutions with business goals.
- Designed and developed robust server architecture, web admin panel, and internal tools for analytics, monitoring, and documentation.
- Delivered full-stack solutions using: Node.js, NestJS, TypeScript, React.js, and Web3 technologies for gaming platform (cityversety-coon.com).
- Deployed and maintained services using GCP: App Engine, Compute Engine, PostgreSQL, BigQuery, Cloud Storage, Cloud Scheduler.
- Spearheaded documentation efforts and improved team onboarding, collaboration, and maintenance efficiency.

Software Engineer

Noisy Miner — Kyiv
Dec 2019 — Dec 2022

- Built and maintained backend services and an admin panel for a high-load, complex gaming platform (clawee.com).
- Worked with Node.js, NestJS, Firebase, Redis, Firestore, Docker, Angular, and various DevOps tools.

- Contributed to scaling services, feature development, and integrations with third-party APIs.

Software Engineer

VirtualMasters.ai — Kyiv
Oct 2019 — Dec 2019

- Participated in backend feature development and system improvements using Node.js.

Junior Software Engineer

ActiveChat Inc. — Kyiv
May 2018 — Oct 2019

- Developed bot components and backend logic for chatbot platform.
- Focused on code reusability, performance optimization, and documentation.

Technology Stack

- Languages & Frameworks: JavaScript, TypeScript, Node.js, NestJS, Express.js, React.js, Angular, Jest, Web3
- Databases: PostgreSQL, MySQL, MongoDB, Redis, Firestore
- Tools & DevOps: Docker, GCP (App Engine, Compute Engine, BigQuery, Storage, Scheduler), AWS (S3, EC2), Firebase, CI/CD, Linux

---

Education

National Aviation University
Master of Automation and Computer-Integrated Technologies
Sep 2019 — Jan 2021

National Aviation University
Bachelor of Automation and Computer-Integrated Technologies
Sep 2014 — Jun 2019

Languages

- English: B2
- Ukrainian: C2

Extra-Curricular Activities

- Node Ukraine Conference Participant — May 2019
- Google Cloud Day Kyiv — Jun 2019
- Learning How to Learn, McMaster University & UC San Diego — Certificate — May 2021
- JavaScript fwdays'21 — Jun 2021
- AWS Certified Solutions Architect — Associate - Badge — Jul 2025
